## Summary

Consistent software developer with 3+ years of experience in programming, UX design, and data science for various projects. Skilled in project management and problem solving under pressure. Extremely creative and dedicated to the team's success. Based in Indianapolis, Indiana, but willing to relocate.

## Education

**Indiana University – Purdue University of Indianapolis (IUPUI)**

*Bachelor of Science in Informatics*: Aug 2019 - May 2023 (anticipated graduation)

## Experience

- Developed many websites and projects outside of class to gain a greater understanding of frontend and backend development.
- Completed OOP projects with other experienced programmers while using the MVC format for files. My teammates preferred to work with me every semester because I'm dedicated to my team's success.
- Managed and analyzed data to help minimize potential errors. Cleaned data, filtered unwanted outliers, and validated the data. All completed with MySQL and MS Excel.

## Skills

- **HTML5**
- **JavaScript (jQuery, React, Bootstrap)**
- **Tailwind CSS**
- **XML**
- **JSON**
- **OOP (PHP, Python)**
- **SQL**
- **C#**
- **Microsoft Excel**
- **Tableau**
- **Adobe Creative Suite (Photoshop, Illustrator)**
